

The Harvard Global Health Institute and the Climate Change Solutions Fund present: “Human Health in a Changing Climate.”

April 27, 2017
250 Jefferson Hall

The impact of climate change on health is visible across the globe, as changing weather patterns impact crops, foster disease, and induce migration. As part of Harvard Climate Week, the Harvard Global Health Institute and the Climate Change Solutions Fund present: “Human Health in a Changing Climate” to present new research and policy implications. This symposium is a continuation of the Climate and Health Meeting on February 16, co-sponsored by former Vice President Al Gore’s Climate Reality Project.

University President Drew Gilpin Faust will introduce the event. Gina McCarthy, former Administrator of the Environmental Protection Agency, will deliver the keynote address, with remarks by Michelle Williams, Dean of the Harvard School of Public Health.
Location: 250 Jefferson Hall.
